REQUIREMENT CI/HTA/R7/58: Report type of construction in progress at Kemajoran Airfield.

REMARKS:

25X1D

[REDACTED] shows the following construction activity in progress at Kemajoran Airfield:

- (1) Fill and grading is well under way on a 1500-foot extension at the north end of the north/south runway. After completion the runway will be approximately 9600 feet long.
- (2) A possible POL storage facility 700 feet in diameter is under construction, approximately 200 feet northeast of the runway intersection. A road leading from the north/south runway to the construction area has been widened to 70 feet.
- (3) Additional construction is underway in two roughly circular areas northwest of the runway intersection. One area is approximately 300 feet in diameter and has one small building near its center; the other is 250 feet in diameter and contains three small buildings.
